30TH JANUARY, 2021

KNOWLEDGE PARTNER:

CENTRE FOR LAW & TECHNOLOGY

ABOUT NAVRACHANA UNIVERSITY

Navrachana University is a Private University established under the Gujarat Private University Act, 2009. The University has Five schools: School of Business and Law, School of Engineering and Technology, School of Liberal Studies and Education, School of Environmental Design and Architecture and School of Science. We have around 22 programs across all the schools. The University has embarked on a new educational paradigm that lays simultaneous emphasis on disciplinary education, inter-disciplinary education, professional education and general education.

ABOUT SCHOOL OF BUSINESS AND LAW

School of Business and Law (SBL) is one the largest School at Navrachana University, Vadodara. Working in close association with the industry and academic experts, right from the curriculum development stage to student's projects, internships, and placements, SBL offers several unique undergraduate and postgraduate level programs in the field of Management (BBA and MBA) and Law (BBA-LLB Integrated). At SBL we make students learn, assimilate, and practice the skills required to excel in today's dynamic world. Faculties at SBL focus on basic concepts and theories of business management and law along with real-life practical cases to develop intellectual and decision-making skills among the students. In the process, the School creates the right kind of values, ethics, and attitude required for being a socially responsible citizen.

ABOUT THE CONFERENCE

The advancement of technology has led to the shaping of the society as well as law across the time. Technology is now recognised as an enabler, necessary for growth and the way forward. Whether it is the growing penetration of digital gadgets in our house or the advent of new technologies like Artificial Intelligence, Big Data etc. New rules set the possibilities of employment of digital technologies in order to attain this or that goal which was reached through other technologies in the past. Due to the marvels in technology, we have achieved a social revolution where the definition of society and socially accepted behaviors have been completely overhauled. These advancements, even though have made our lives easier have also led to a disruption amongst the regulatory framework over the world. The change in technologies influences also the source and the structure of the rules. Due to new technologies, we need older laws to address the various issues involved or the legislature to develop new laws. It has placed all of us in a spot to address and strike the correct balance between innovation, protection of consumers and resolving potential threats.

OBJECT

The present conference is an effort to study the innate relationship of law and technology. It undertakes to make a serious enquiry as to how the issues under ever-changing technology can be effectively addressed through law. For this purpose, the conference contains a series of themes and subthemes dedicated towards understanding the interrelationship between law and technology under different categories and contexts.

TARGET AUDIENCE

The conference is open to academicians, students, legal professionals and anyone interested in the subject.
